2 viral reels have no voice in the file
Instagram serves

The 7 rules

1	Talk before 0.7 s	In all 6 viral reels with a voice track, the first word lands between 0.54 and 0.84 s. No salam, no name, no "today I will show you".
2	Open with a hook line or the real numbers	His viral openers: "...شوف، يلا كنتي غادير...", reading a real prescription aloud ("هادي ناقصة عشرة..."), or "...الناس اللي عندهم...". Ours blend five hook types so no two reels in a row open the same way (v3 below).
3	Name the costly mistake in the first 5 s	213K: "غاطيح فلوسك، دير زاج غالي ويجيك الزاج غليظ". 139K: "تقدر دير أغلى زاج وما تشوفش ميزان". The fear is losing money at the shop.
4	The product is in his hand from frame 1	A frame, a lens or a prescription is in shot from the first frame in 6 of the 8 viral reels, but only 2 of the bottom 10. He pushes it toward the lens.
5	One hard number the viewer can check	"45 à 49 maximum", "+3.00", "-10 et plus, oublie le noir", "47". The viewer checks it against their own prescription or frame.
6	Prove it on camera	Lens edge turned to the camera to show thickness, a real prescription photo with a green circle, then the glasses on the face (often with the sun clip).
7	One take, selfie, in the shop	Handheld, slightly low angle, shelves of frames behind. 2.2 to 2.9 words per second, no pause longer than 1.6 s. Viral length 31 to 59 s, median 41 s.

Why it works on our ICP

- Our buyers (people with strong corrections, first-time progressive buyers aged 40–55, parents) are about to spend money at an optician. His openers name what they fear: paying for an expensive lens that comes out thick, heavy, or that they can't see well with.
- The hard number turns the reel into a self-check: the viewer looks at their own prescription or frame ("I'm -10, so no black frame"). That is the "this is about me" moment of the Know phase, and it drives comments with numbers.
- The proof is physical and filmed in his own shop: a real lens, a real prescription, the result on a face. That builds the trust of the Like phase without any selling. He never asks for a sale on camera.

v3: blended hooks, #6 becomes a conversation

- **Hooks, blended.** "شوف" stays, mixed with four other hook types so no two reels in a row open the same way. Hook mix on page 2.
- **#4 stays a comment reply**, unchanged.
- **#6 becomes a conversation** (was the DM read-out). Saad asks 3 ICP-fear questions off camera (paid 2500 DH and the lenses are thick; will a -10 lens look big or bulge; do I really need 1.74). The optician answers with the 3 lenses in hand. No fake DM needed.

Same topic, opposite results

The topic does not make the reel go viral. The opener, the object and the shot do.

TOPIC	WIN	WHAT THE WINNER DID	FLOP	WHAT THE FLOP DID
Frame choice for strong corrections	213K	Frame in hand at 0 s. "شوف... غاطيح فلوسك". Lens diagram, then the frame size engraved on the temple circled in green: "45–49 maximum".	38K / 13K	38K: pen in hand, close-up inserts. 13K: talking hands, then a screen recording of the edging software.
Progressive lenses	139K	Frame in hand, "Progressif" badge. "شوف، يلا كنتي... ركز معايا غادير...". Rule: the eye must sit above the frame's middle line.	9K	Pen only, nothing physical. Opener "واش خبارك أن كايين... أحسن وقت..." sounds like a FAQ.
Mineral vs organic lens	183K	Reads the -10 prescription aloud while holding the lens. Prescription photo, lens edge, try-on with sun clip.	33K	Wide tripod shot across the desk, face small in the frame, badge only.

Openers at the bottom of his feed: "واش خبارك أن..." (22K, 9K), "أهلا بيكم" (13K). "شوف" alone is not enough (it also opens two 16–19K reels): it works with the object in hand, the costly mistake and the number.

Never do (none of these passed 35K)

- Wide tripod shot from across the desk (best result: 33K)
- Screen recording of software (13K–21K)
- Hands only, no face (14K)
- Abstract topic with no object to show (pen only: 9K–11K)
- Opening with a question that sounds like a FAQ (ours must promise a payoff), a greeting or "today"

Hook mix (v3)

TYPE	LINE	REELS
شوف (chouf) + object	شوف هاد الدائرة... شوف، يلا ولدك...	#2 · #7 (+ after hook #1, #4)
Promise	باش ما يجيكش الزاج غليظ ولا نظارات ديال لقاع الكاس، تبع معايا.	#1
Number	moins dix, moins quatorze, moins dix- 8 من 10 ديال les consultations ديال ...huit	#5
Warning	رد البال باش ما تتقولبش. (said alone, then pause)	#3
Question	واش فراسك بلي وحدة من هاد تلت ديال الكادرات غالية ب تلت مرات؟	#8
Spare	واش فراسك السر ديال كيفاش يجيك الزاج رقيق؟	next batch

Anatomy of a reel (40–45 s)

HOOK 0–5 s	THE MISTAKE 5–10 s	RULE + NUMBER 10–22 s	PROOF 22–36 s	CTA 36–42 s
One hook line from the mix + object in shot. First word ≤ 0.7 s	What it costs: money, a thick lens, not seeing well	One number to check. Prescription overlay, green circle	Lens edge to camera, then the glasses on the face	One line from the CTA bank

FILMING KIT

iPhone held at chest height, slightly low angle, 9:16 · Shot in the shop with the frame shelves behind · One take. Cut only to remove pauses · Lav mic · Badge in a white rounded box, top left, carrying the key number · Prescription photos with the patient's name hidden and a green circle on the number · Darija captions, 7 words or fewer (darija-transcribe → SRT) · Optician, never doctor: anything that sounds like a symptom → "شوف" l'ophtalmologue".

CTA bank

Each reel ends with one line from this bank. Never two. Say it in one breath, while still holding the object.

Know phase "this is about me"

CTA	LINE (DARIJA)	WHY IT FITS
Comment your number	Kteb l'correction dyalk f commentaire: -6? -10? Add?	Qualifies the viewer and lifts reach. The self-test and guess-the-correction formats got the most comments in our data (2.1 per 1,000 views)
Comment your test result	Galli chnou chfti: l'khtout kamlin kif kif wla la?	The viewer just did the test, so answering costs him nothing
Save	Sauvegardi had l'vidéo, ghadi t7tajha nhar tchri nnaddarat	Fits education videos. Saves predict buying intent
Send it to someone	Sifto l chi wa7ed f 3a2iltek kayb3ed t'téléphone bach y9ra	The 40–55 buyer is often sent the video by a son or daughter

Like phase "I trust this guy"

CTA	LINE (DARIJA)	WHY IT FITS
Follow for the series	Tab3ni, kol simana kanjawb 3la so2al wa7ed 3la chouf dyalk	A promise of the next episode. YourVision's series episode drew 246 comments
Ask him a question	Sewwelni ay so2al 3la progressifs f commentaire, w njawbek b video	Every answer becomes a new video, and the asker feels heard
Tell your story	Nta chhal hadi w nta labes nnaddarat?	Personal comments build familiarity
Soft DM keyword	Sift 'GUIDE' f DM, nsift lik chnou tsewwel l'opticien 9bel ma tchri progressifs	A free checklist, not an offer. It opens a DM thread and creates a GHL contact without selling

Release order and shop checklist

WEEK	REELS	WHY THIS ORDER
1	#5 Two frames · #1 Guess the correction	Closest to his 213K and 183K reels. They set the account's average and pull in "comment your number".
2	#4 Comment reply · #2 Self-test	#4 needs a real comment: by week 2, week 1's reels have brought some in. The self-test drew the most comments in our data.
3	#3 Prescription · #6 Conversation	Saves and shares. #6 answers the money and thickness fears head-on, with Saad asking off camera.
4	#7 Kids · #8 Blind test	Like phase: familiarity and the series. Kids reaches less on his account (13K), but it matches Gzenaya's parent-led ads.

Confirm with the shop before filming

- Real strong-correction cases (−8, −13) with the client's written consent to show the prescription (name hidden)
- The lens indices actually stocked (1.5 / 1.6 / 1.67 / 1.74) and the frame sizes for #5
- The real frames and prices for the blind test (#8)
- Real comments for #4 (screenshots with names hidden)
- The "8 out of 10" line in #5 matches their own consultations; if not, the optician says "أغلب" (most)
- Saad on set for #6, holding the phone and asking the 3 questions off camera
- Who appears on camera: the same optician on every reel, so the Like phase builds trust in one face

Method: 34 Benjelloun Vision reels (33 Instagram, 1 TikTok), views as seen on 30 Sept 2026. Voice transcribed locally with darija-transcribe (MoulSot v0.3 + MMS word alignment): 6 viral reels in full, the rest on their opening 12 s (6 of those files had no audio). Every reel coded frame by frame for shot, object, badge and overlays. "👉" (83K) and "L'ophtalmo le matin" (78K) have no voice in the downloadable file, so they were coded on the image only. The client edition of this playbook (French) leaves out every other optician's name.
